Summary

I am a driven and meticulous student of Artificial Intelligence and Machine Learning at Chandigarh University, with a strong foundation in C and C++. My interest in machine learning and its practical applications is continuously growing. I also have a basic knowledge of Android development and web technologies, including HTML, CSS, and JavaScript. I enjoy problem solving, working with teams, and consistently seek to acquire new tools and technologies to build innovative solutions.

Education

Chandigarh University

Bachelor of Science in Computer Science with specialization in AIML — CGPA: 8.03

Sep 2022 – Present

Mohali, Punjab

Shanthi Rani Matric Hr Sec School

Bio-Maths Student — 92%

2020-2022

Kallal, Tamil Nadu

Certifications

Generative AI

Oracle University

Android Development Using Kotlin

Infosys Springboard

Artificial Intelligence

IIT Bhubaneswar

Predictive Analytics using IBM SPSS Modeler

IBM

Experience

TechnoHacks Solutions Pvt. Ltd.

February 2025

Python Development Intern

Remote

- Developed a complete Python-based project during the internship, applying core programming concepts.
- Gained hands-on experience in designing, coding, and debugging Python applications.

Projects

Machine Driven Personality Prediction Using CV Analysis | VS Code, Python, Machine Learning

June 2024

- Developed a machine learning system to predict personality traits from CVs using natural language processing.
- Evaluated multiple algorithms, with Logistic Regression achieving the highest accuracy.
- Created a web app to predict personality traits from uploaded CVs.

Credit Card Fraud Detection using Machine Learning | Jupyter Notebook, Python, Machine Learning

July 2025

- Built a model to detect fraudulent credit card transactions using real-world imbalanced data.
- Applied SMOTE for oversampling and used Random Forest & XGBoost for classification.
- Achieved high recall and ROC-AUC, ensuring effective fraud detection.

Detection of Mental Health Issues from Social Media Posts | Python, Machine Learning

July 2025

- Developed a machine learning model to detect depression from social media posts using BERT embeddings and sentiment analysis.
- Preprocessed text data with lemmatization, stopword removal, and contraction handling.

Technical Skills

Languages: Python, Java, C++, HTML/CSS, JavaScript, SQL, Android development using Kotlin, Machine Learning

Developer Tools: VS Code, Android Studio

Achievements

Participated in a Treasure Hunt organized by Chandigarh University, competing with 1000 students across 4 levels, where our team secured the 1st prize.

Published a paper titled "Machine Driven Personality Prediction" in IEEE.

Solved over 100 problems on LeetCode, strengthening algorithmic and problem-solving skills.

Participated in the Swachh Bharat Abhiyan, a nationwide cleanliness drive, to promote cleanliness and community service.

Interpersonal Skills

Adaptability, Management & Coordination, Decision Making, Time Management, Problem Solving
